

PRESS RELEASE 12-2022

Call for papers:

Search for contributions about underwater technology

Düsseldorf, November 24, 2022. Until December 8, 2022, DVS – German Welding Society is calling for the submission of papers for the bilingual UNDERWATER TECHNOLOGY CONFERENCE. Under the auspices of the DVS CONGRESS, the well-known specialist conference will take place in Essen in September 2023 parallel to the world's leading fair called SCHWEISSEN & SCHNEIDEN. A get-together of the underwater technology sector is planned for September 12, 2023 in Fair Hall 7 in Essen. Here, companies will present their products and services on a separate exhibition area live and, in part, "under water".

Every two years, the conference brings together researchers and developers, professional divers, diving companies, representatives of the offshore energy market and other interested parties. In the past almost 15 years, the event format has developed into one of the most important forums for industrial divers and companies in the field of maritime technology.

The following subjects are popular for the offered papers: underwater welding and cutting, fabrication technologies in underwater technology, quality assurance, occupational health and safety, corrosion protection under water, news from research and development, norms and standards as well as best-practice projects.

In 2023, the conference will encompass a German-language programme section and an English-language programme section for the first time. Offers for papers are being communicated exclusively online. When the deadline has passed, the Programme Commission – consisting of renowned experts from industry and research – will compile a diverse lecture programme for the UNDERWATER TECHNOLOGY CONFERENCE.

An overview of all the dates:

UNDERWATER TECHNOLOGY CONFERENCE
Get-together, Messe Essen, Hall 7, exhibition area
DVS CONGRESS 2023
World's leading fair: SCHWEISSEN & SCHNEIDEN

September 12-13, 2023
September 12, 2023
September 12-15, 2023
September 11-15, 2023

About DVS

DVS – German Welding Society is a technical-scientific society which, encompassing more than 120 years of experience, is dedicated to the around 250 different processes for joining, cutting and surfacing. The heart of all DVS activities is the joint technical-scientific work. It stands for the persistently close interlinking of contents and results from the fields of research, technology and education. The affiliated companies of DVS process the results from the society and present them to the outside with their own main focal points. The head office of the society recognised as non-profit-making is in Düsseldorf. The around 18,000 members are looked after directly in situ by the DVS state branches and the DVS district branches. Together, all the members of the society are committed to joining technology suitable for the future in every respect.
